AMENDMENT UNDER 37 C.F.R. § 1.111

Commissioner for Patents Washington, D.C. 20231

Sir:

In response to the Office Action dated December 19, 2002, please amend the aboveidentified application as follows:

IN THE CLAIMS:

Please enter the following amended claims:

1. (Amended) A method for forming an azo colorant, wherein a coupler having a leaving group at a coupling position thereof and a diazo compound are used, and the method has a faster coupling reaction rate constant, measured by mixing equivalent amounts of an ethyl acetate solution containing an 8 x 10⁻⁵ mole concentration of the diazo compound and an ethyl acetate solution containing an 8 x 10⁻³ mole concentration of the coupler and a base with a stopped flow measurement device and by measuring change over time of an absorbance of the produced colorant and applying the resultant value to the following formula (1), than an azo dye-
